Abstract

# “What is a Manufacturing Engineer doing in Optics and Photonics?”

Matthias Hirsch

12:00pm Thursday 24th November 2016

Lecture Theatre 203 Tower Building

All Welcome

What is a Manufacturing Engineer doing in the Optics and Photonics group? This talk will give you an insight to manufacturing engineering and how we can harness the capabilities from a multitude of engineering disciplines in order to optimise part manufacture and develop methodologies for analysis. Our focus in this context is the high value additive manufacturing sector, giving you insight in machine development, part manufacture and analysis methods.
