

Laser Ultrasonics 2018

9–13 July 2018

University of Nottingham, Nottingham, UK

Organised by the IOP Physical Acoustics group
Co sponsored by the IOP Optical group

<http://lu2018.iopconfs.org>

The 6th International Symposium on Laser Ultrasonics (LU2018) brings together world leading researchers in Laser Ultrasonics, Phononics and light-matter-sound interactions. The symposium is dedicated to the latest scientific results, methodological and technological advancements, and applications of Laser Ultrasound.

Following on from LU2016, a special industry day will be organised for end users of laser ultrasound technology. This will provide an opportunity for end users in industry and the clinic to meet with producers of laser ultrasound technology.

There will be social events in order to promote informal discussion and networking among the participants as well as events for early stage career development.

Authors are encouraged to submit a 1 page abstract either for oral or poster presentation.

We look forward to meeting you at the 6th Symposium on Laser-Ultrasonics LU2018 in Nottingham.
